Dear Neighbor,

If you have a pet that you consider family, then this gift letter has a double value because it provides two important examinations.

First, it entitles you to a **valuable medical exam for only \$20** for your pet at North Creek Pet Hospital. While you're here we can take care of any required pet licensing and update your pet's vaccinations if needed.

Second, it gives you a chance to **examine us**. We may be biased, but we think that choosing a veterinarian is as important as choosing a family doctor, so we would like you to look us over. We would like you to see our hospital for yourself. It is a chance to meet our staff and experience the quality of medical care and personal care that we provide for the animals who bring so much love into our lives. **This is an easy way to see if we live up to your expectations.**

North Creek Pet Hospital follows the highest standards for veterinary medicine. **We are very proud of our hospital and the quality of our staff.** We strive to maintain the most modern and up-to-date veterinary hospital possible. The hospital has its own in house clinical lab, intensive care facilities, digital ultrasound and x-ray equipment, endoscopes, modern anesthetic equipment and anesthetic monitors, laser surgical unit, modern dental equipment and up to date surgical operating room. Sure we can handle the complicated cases, but we take just as much pride in the wellness part of our job. Whether it is spay/neuter, or dental scaling and polishing or maybe just vaccines, we want to provide the best care possible for your family friend. We also coordinate with a number of specialists that will come to our hospital to assist in the care of your pet should it be necessary, and we offer innovative treatments, like shockwave therapy for arthritis.

I hope you'll take advantage of this opportunity to come in and meet us. Even though we take pride in being a state of the art hospital, our care for your pet is coming straight from the heart. We look forward to meeting you and your pet.

Warm regards,
Jon Bruhn, DVM
Medical Director

P.S. After your visit, don't forget to get your North Creek Hospital refrigerator magnet.
(I guess this is what they mean by animal magnetism!)

**PLEASE PRINT THIS LETTER AND BRING IT WITH YOU
TO YOUR APPOINTMENT TO RECEIVE YOUR PET'S \$20 EXAM!**
